Industry veteran John Raudabaugh joins Produce Pro Software

Woodridge, IL (September 8, 2008) — Produce Pro Software, a leader in the field of ERP software for the produce industry, is pleased to announce the hire of John Raudabaugh as Director of Business Development and Operational Solutions.

Raudabaugh has more than thirty years of supply-chain experience, with extensive focus on RFID implementation and operational efficiency. Well-known throughout the industry, he has participated in numerous initiatives during his career, including the PMA RFID Steering Group.

In the last year and a half, he has worked closely with Produce Pro Software's WMS implementation team as an operations consultant and advisor. The business relationship quickly and mutually developed into longer-term interest. "John's achievements and his passion for this field quickly helped us realize the magnitude of what he has to offer," said Dave Donat, President. "He is not only an invaluable resource for our current and potential clients, but also for us as a growing company."

Raudabaugh's role at Produce Pro Software will encompass multiple areas, including business development with respect to new and existing clients. He will also continue his work with the company's WMS implementations, assisting clients with operational improvements and planning.

About Produce Pro Software

Produce Pro Software is a full-service provider of software and integrated technology solutions. Designed specifically for handling, distributing, and tracking perishables, the Produce Pro software system currently supports more than one hundred successful food-industry clients at various points in the supply chain, including wholesalers, distributors, processors, repackers, foodservice suppliers, and terminal markets.

Founded in 1990, the company is headquartered in Woodridge, IL (Chicago area), and also has offices in Los Angeles and Philadelphia. For more information, visit www.producepro.com.
