Profitability At The Core

Produce Pro Software is the industry leader because our enterprise resource planning (ERP) solution helps companies of all sizes become more profitable. Our core system can **increase your organizational efficiency, minimize waste and loss, and reduce operating costs.**

Real Answers In Real Time

The world of perishables moves fast in real time. So does the fully integrated Produce Pro core system. It tracks the details of every product lot **throughout its entire lifecycle**. Now your employees can see what is on hand, committed, expected and available to sell. Our core system also keeps you on top of it all with reporting and documentation that identifies patterns that affect your operational efficiency.

Fully Integrated Core System Functions
From farm to fork, information keeps flowing

Accounting · Shipping and Receiving · Routing and Logistics · Processing · Pricing · Business Analysis · Sales Order Processing · Purchasing · Inventory Management · Picking · Lot Tracking / Traceability · Repacking

Produce Pro Puts Your Needs First: Every business we work with has its own distinct needs and processes. That's why our core software system configures to your unique business.

Our Relationships Last: Since 1990, our fully integrated software and services have been growing businesses and revenue.

Our Core System Is As Individual As Your Needs

Maximum Flexibility
means the system configures to your specific needs without a developer

Simple Data Entry
Using only the fields that are important to your business

Custom Analysis
of inventory and sales provides an instant snapshot of your business and performance

Automated Reports
Configured to your needs, run on your schedule and delivered to you via email

FIRST
Start With Our Core System.

Then Manage Every
LAST
Detail With Our Additional Solutions.

These options can be added seamlessly to your Produce Pro core system to meet any specialized business requirements.

Warehouse Management System (WMS)

- Standardizes workflows and **improves productivity**
- Creates **visibility** for inventory throughout your facilities **down to the pallet level**
- **Minimizes mistakes** by ensuring orders are completed accurately
- Our WMS customers can see **up to 99% accuracy** on inventory
- **Reduces bottom line** costs

Mobile App Suite

- Designed to **support business-critical operations**, including delivery, quality control, and food safety
- Improves accuracy, **eliminates delays** and paperwork

Driver Solution

- Optimizes delivery procedures with **open, real-time communication** between drivers and dispatch
- Tracks each truck's location, **transmits the status of each delivery** and supports remote task management

Analytics

- Generates **dynamic charts**, graphs and reports on configurable executive dashboards
- Provides **even more robust reporting** and analysis

Customer Relationship Management (CRM)

- **Manage current accounts** instantly
- Create new accounts, **leads and opportunities**
- **Track and review** account activity

Document Imaging

- **Scan, store and manage** items like invoices and credit slips
- Access documents **"on the fly"** for verification or dispute resolution

E-Commerce / Web Ordering

- Provides **your online store** where customers can browse your catalog, place and view online orders
- Runs on Produce Pro data and **communicates automatically** with the core system

EDI Support

- Provides **scalable compliance** without the inconvenience and expense of setting up your own EDI system
- Handles **setup, transmission and monitoring** of transactions

Disaster Recovery

- **Mirrors the data** on your live server, maintaining a copy that runs only minutes behind
- Provides **quick recovery** with minimal data loss and very little "catching up" for your staff
