Choice For Working
More Profitably

WMS Your Business
Will Ever Need

Fully Integrated With Your Business

What if you could manage your warehouse inventory, staff and supply chain in the **most efficient and accurate** way possible? That's precisely what the Produce Pro Software Warehouse Management System (WMS) delivers.

Now you can increase the efficiency of your warehouse operations at every stage of the process, from receiving and packing to inventory counts and shipping. You can also **maintain complete traceability** every step of the way. And you'll have better visibility for inventory throughout your facilities, right **down to the pallet level**.

The Produce Pro WMS is flexible and scalable enough to serve any sized operation. It **helps your entire staff become more productive**. They'll complete work accurately and on time, which means better customer service.

As Flexible As Your Needs

Produce Pro offers multiple WMS technology options, including pick by scan and **pick by voice powered by Honeywell® Vocollect™**. That means you can select the technology that best fits the requirements for each workflow and maintain fully integrated and accurate inventory in real time.

Think Produce Pro First: The industry's leading software company is also the choice for a robust WMS.

Get ROI That Will Last: Improve your efficiency, accuracy and reduce costs every month with Produce Pro WMS.

10 Reasons To Use WMS From Produce Pro

1. **Improve order accuracy** for customers
2. **Improve lot inventory accuracy** and reduce discrepancies
3. **Enhance visibility into inventory** and operations across single or multiple locations
4. **Gain control** at key points and reduce mistakes
5. **Increase picking efficiency** and accuracy
6. **Track inventory by pallet and slot** across all warehouse locations
7. **Reduce startup and training time** for new hires
8. **Minimize clerical hours** and reduce paperwork
9. **Track worker productivity** in real time
10. **Get a clear ROI** from fully integrated and accurate inventory

FIRST

Choice For Your
WMS Solution.

LAST

Word In Traceability
And Efficiency.

Key WMS Benefits

Our WMS customers can see up to 99% accuracy on inventory.

Traceability

Depend on accurate traceability **throughout the lot's lifecycle**, no matter how it is transformed or where it is moved while in your facilities. Our system also handles procedures necessary for every stage of the Produce Traceability Initiative implementation.

Receiving

Your staff will **know every detail** about inbound shipments. Then they can verify products and quantities, record any discrepancies, and move the process smoothly into the put-away stage. And you'll have visibility and full traceability on any lot in real time.

Movement

Our WMS **keeps vital perishables moving**, from inbound loads to replenishment. The system can direct staff on what work is ready to be executed and where pallets are to be delivered.

Picking

Ensure the right product is being selected for every line because selectors have a system working with them at each pick slot. Supervisors have **visibility to assign out work, track progress and manage issues** as they happen. Workers are more productive and your entire operation runs more efficiently.

Repack

Now your workers scan input lots onto each line, then scan finished goods into inventory or onto an order. This **ensures the accuracy and traceability** of each repack or pack-out.

Shipping

System controls help ensure each order is **properly completed, palletized, and loaded** onto the truck in stop order. Now it's easy to resolve short items, substitutions, add-ons, removals and all the details to get the order shipped complete. As a result, all pallets get loaded and drop-offs are simpler for drivers.

Why Our Customers Choose Produce Pro

“Since implementing WMS our **turnover has dropped to almost zero**. The ease of training new associates and the improved ratios has a very positive, upward impact.”

– Dennis Michael, Director of Operations,
Primo Produce, Inc.

“In a nutshell, our warehouse and office management can **manage workflow with precision and ease** that takes us to the next level of efficiency and agility.”

– Corey Dietz, Director of Operations,
Heartland Produce
