

Eliminate Hardware

No hardware to purchase upfront or replace on an ongoing basis.

Offsite Servers

Servers are all offsite. This protects against natural disasters and accidental damage.

No IT? No Problem.

Don't know Linux? No server room? No engineers onsite? These aren't necessary; making it less expensive.

Reliability

Minimize downtime when local hardware fails, and maintain a high availability environment.

Top reasons to opt for a Hosted Server Bundle

Backups

Access a fully managed backup solution; maintained and monitored by a dedicated Produce Pro Engineering team.

Support

Save money on support. With fewer issues, the need for engineering support is reduced.

Simplify Connectivity

Connect to a hosted server with just an internet connection. Remote connectivity is also much easier to configure and maintain.

Scalable

Only pay for what you need at any given time. Reconfiguration is simple.
