

Produce Pro's New Tool Suite for **PROCESSING, PACKOUTS, AND PRODUCTION MANAGEMENT**

Production planning is all about visibility and control. You need to know what's in demand, what you've got in the works, and how your lines are performing. Whether you run just one line or many, Produce Pro's Production Planning tools empower your leads and supervisors with robust analysis at every level.

- Optimize production opportunities each day with timely, accurate planning
- Begin with system-calculated **input and demand requirements**, including bulk product, packaging, WIP, labor estimates — all based on real-time data
- Manage both **regular and contingent labor** with ease: scan barcoded badges in and out to start and stop work
- **Adjust plan quantities and manage resources** as needed to build up inventory, maintain pars
- Pull up an accurate **overview of your day**, organized by repack line
- Track real-time progress, completion status, and other **performance KPIs**
- Powerful **reporting capabilities**, both on-screen and in scheduled reports; analyze past production or future needs

Let our **production planning tools** do the "leg work," so you can focus on optimization and service.
