

Top 10 reasons

to choose Heartland for payment processing with Produce Pro E-Commerce

1. Pass along processing fees to the customer

Choose from multiple fee models, including Convenience Fee (certain transaction processing fees are paid by the customer) and Merchant Absorbed (standard). These options exist for both credit/debit card and eCheck (ACH) payments.

2. Transparent pricing with no inexplicable fees

Know what you're paying for and why. We're known for our commitment to fully transparent pricing.

3. Automatic deposits

Eliminate tedious, manual reconciliations. We integrate directly with Produce Pro and will automatically post deposits in your AR system.

4. Full accounting integration

Reduce the amount of duplicate work and the number of keystrokes it takes to accept and log payments.

5. Single point of contact

Partner with an assigned implementation specialist who understands the Produce Pro setup and will help you every step of the way.

6. Online boarding portals

Sign up with limited paperwork and underwriting requirements. Our online portals make it quick and easy to get started and begin accepting payments.

7. Dedicated support

Enjoy peace of mind knowing our customer support team will be responsive and available to you 24/7.

8. Detailed reporting

Simplify your reporting and search needs with real time batch monitoring, deposit monitoring and transaction finder capabilities.

9. Fast batch deposits

Allow batch deposits to clear and fund into your bank account quickly. Next-day* and two-day funding options may be available via ACH processing.

10. PCI compliance

Limiting risk can help reduce potential fraud and increase the likelihood of winning chargeback disputes. We offer a short-form, self-assessment questionnaire (SAQ) and support to help you get and stay PCI compliant.

To learn more, contact Colin Flannery at 614-560-0983 or colin.flannery@heartland.us
